The quality and testing of materials used in construction are covered by reference to the appropriate ASTM standard specifications. Welding of reinforcement is covered by reference to the appropriate AWS standard. Uses of the Code include adoption by reference in general building codes, and earlier editions have been widely used in this manner. The Code is written in a format that allows such reference without change to its language. Therefore, background details or suggestions for carrying out the requirements or intent of the Code portion cannot be included. The Commentary is provided for this purpose. Some of the considerations of the committee in developing the Code portion are discussed within the Commentary, with emphasis given to the explanation of new or revised provisions. Much of the research data referenced in preparing the Code is cited for the user desiring to study individual questions in greater detail. Other documents that provide suggestions for carrying out the requirements of the Code are also cited.

The newest publication from the Tilt-Up Concrete Association is the second in a planned trilogy of resources covering the architecture, engineering and construction of Tilt-Up. Continuing the high quality with which *The Architecture of Tilt-Up* was printed and assembled, the new (10 1/2 x 10 1/2) book presents state-of-the art information and large colorful imagery of the construction process. Topics include: planning, slabs and foundations, panel layout and forming, reinforcement, inserts and embedded items, placing and finishing of the panels, lifting, setting and bracing of the panels, connections and finishing touches.
