this is the adopted textbook for AO spine courses, but it's in general one of the best textbook of spine surgery and certainly the text I've found more useful in my practice. Excellent correlation between anatomy, physiology, pathology and surgical planning, clear illustrations, plain text, and a useful companion DVD.

The DVD has all the content of Susie's class, including the valuable understanding of the scientific basis of what you're doing. I like Susie's training because it's based on scientific research, not ooga-booga, and because it's tailored especially to be safe for women over fifty who are at risk because of low bone density.
