This month's is Michael Behn, owner of Moshi Moshi Knife Sharpening ... can be brought back to life. I identify as a craftsman. I have reached out to well-respected people in the knife ...

This new edition of the visionary social history of Los Angeles is "as central to the L.A. canon as anything that . . . Joan Didion wrote in the seventies" (New Yorker) No metropolis has been more loved or more hated. To its official boosters, "Los Angeles brings it all together." To detractors, L.A. is a sunlit mortuary where "you can rot without feeling it." To Mike Davis, the author of this fiercely elegant and wide-ranging work of social history, Los Angeles is both utopia and dystopia, a place where the last Joshua trees are being plowed under to make room for model communities in the desert, where the rich have hired their own police to fend off street gangs, as well as armed Beirut militias. In City of Quartz, Davis reconstructs L.A.'s shadow history and dissects its ethereal economy. He tells us who has the power and how they hold on to it. He gives us a city of Dickensian extremes, Pynchonesque conspiracies, and a desperation straight out of Nathaniel West—a city in which we may glimpse our own future mirrored with terrifying clarity. In this new edition, Davis provides a dazzling update on the city's current status.

This book contains accepted papers presented at ICEUTE 2020 held in the beautiful and historic city of Burgos (Spain), in September 2020. The 11th International Conference on European Transnational Education (ICEUTE 2020) has been a meeting point for people working on transnational education within Europe. It has provided a stimulating and fruitful forum for presenting and discussing the latest works and advances on transnational education within European countries. After a thorough peer-review process, the ICEUTE 2020 International Program Committee selected 44 papers which are published in these conference proceedings achieving an acceptance rate of 41%. Due to the COVID-19 outbreak, the ICEUTE 2020 edition was blended, combining on-site and on-line participation. In this relevant edition, a special emphasis was put on the organization of five special sessions related to relevant topics as Role of English in Transnational Education and Teacher Training, Personalization and ICT: a Path to Educational Inclusion, Innovation and Research Findings in Engineering Higher Education, Practical Implementations of Novel Initiatives, and Innovation in Computer Science Higher Education. The selection of papers was extremely rigorous in order to maintain the high quality of the conference, and we would like to thank the members of the Program Committees for their hard work in the reviewing process. This is a crucial process to the creation of a high standard conference, and the ICEUTE conference would not exist without their help.

An ambitious new work by a well-respected sociologist, Information and Organizations provides a bold perspective of the dynamics of organizations. Stinchcombe contends that the "information problem" and the concept of "uncertainty" provide the key to understanding how organizations function. In a delightful mix of large theoretical insights and vivid anecdotal material, Stinchcombe explores the ins and outs of organizations from both a macro and micro perspective. He reinterprets the work of the renowned scholars of business, Alfred Chandler, James March and Oliver Williamson, and looks in depth at corporations like DuPont and General Motors. Along the way, Stinchcombe explores subjects as varied as class consciousness, innovation, contracts and university administration. All of these analyses are distinguished by incisive thinking and creative new approaches to issues that have long confronted business people and those interested in organizational theory.A tour de force, Information and Organizations is a must-read for business people and scholars of many stripes. It promises to be a widely discussed and debated work.

This title, first published in 1989, is an in-depth biographical dictionary of the Nobel Laureates in Economic Sciences from 1969 to 1988. Each biographical entry includes a segment on the foundations of their career in the economic sciences, summaries of their most notable discoveries and ideas and other notable contributions. Each entry also includes a selected bibliography for further reading on the individual. This book will be of particular interest to students of the history of economic thought.

There currently exists an abundance of materials selection advice for designers suited to solving technical product requirements. In contrast, a stark gap can be found in current literature that articulates the very real personal, social, cultural and economic connections between materials and the design of the material world. In Materials Experience: fundamentals of materials and design, thirty-four of the leading academicians and experts, alongside 8 professional designers, have come together for the first time to offer their expertise and insights on a number of topics common to materials and product design. The result is a very readable and varied panorama on the world of materials and product design as it currently stands. Contributions by many of the most prominent materials experts and designers in the field today, with a foreword by Mike Ashby The book is organized into 4 main themes: sustainability, user interaction, technology and selection Between chapters, you will find the results of interviews conducted with internationally known designers. These 'designer perspectives' will provide a 'time out' from the academic articles, with emphasis placed on fascinating insights, product examples and visuals

Provides an approach to the book of Tobit from a range of disciplines: literary, feminist, anthropological, imagination, theological, textual and historical. This book considers some Latin manuscripts, encompassing an article introducing a print of the Ceriani Latin text, and includes an overview of the Old Latin textual tradition and context.

Newly arrived in New York in 1882 from Tsarist Russia, the sixteen-year-old Bernard Weinstein discovered an America in which unionism, socialism, and anarchism were very much in the air. He found a home in the tenements of New York and for the next fifty years he devoted his life to the struggles of fellow Jewish workers. The Jewish Unions in America blends memoir and history to chronicle this time. It describes how Weinstein led countless strikes, held the unions together in the face of retaliation from the bosses, investigated sweatshops and factories with the aid of reformers, and faced down schisms by various factions, including Anarchists and Communists. He co-founded the United Hebrew Trades and wrote speeches, articles and books advancing the cause of the labor movement. From the pages of this book emerges a vivid picture of workers' organizations at the beginning of the twentieth century and a capitalist system that bred exploitation, poverty, and inequality. Although workers' rights have made great progress in the decades since, Weinstein's descriptions of workers with jobs pitted against those without, and American workers against workers abroad, still carry echoes today. The Jewish Unions in America is a testament to the struggles of working people a hundred years ago. But it is also a reminder that workers must still battle to live decent lives in the free market. For the first time, Maurice Wolfthal's readable translation makes Weinstein's Yiddish text available to English readers. It is essential reading for students and scholars of labor history, Jewish history, and the history of American immigration.

The scholarly tendency has too often weakened the conspicuous novelty and originality that characterizes Zeus in the Iliad. This book remedies that tendency and depicts the extraordinary figure of Zeus: lord (or impersonation) of lightning and thunders, exclusive master of human destiny --and therefore of human history--and chief of Olympus. This unique personality endowed with polyvalent powers represents itself the conflict between superhuman moral indifference for mortal destiny and anthropomorphic feelings for human beings: he both preordains the death of his son and weeps on his demise. Zeus embodies the Mysterium tremendum. This new Zeus cannot glance at the past image that the tradition painted of him without smiling at its simplicity and disrespect: a parodic or amusing tone surrounds him as he refers or is referred to aspects of his traditional image. The great characters of the Poem give two wise responses to Zeus, lord of destiny: "heroic death" or serene acceptance. We, the readers, are expected to react in the same way.
