Das Zeitalter des Badezimmers als abgeschlossener Reinraum innerhalb des Wohnraums wird zu Ende gehen. Ausgehend von dieser die üblichen Grenzen des Wohnbaus sprengenden These hat sich der Lehrstuhl Marc Angélil (Architektur und Entwurf) der ETH Zürich in enger Zusammenarbeit mit der Firma Dornbracht und Architonic mit unserem heutigen Verständnis von Körperlichkeit und dessen Potenzial für den architektonischen Entwurf beschäftigt. Privates und Intimes sind nicht mehr deckungsgleich. Viele für lange Zeit private Handlungen rücken medial oder physisch rigoros in die Öffentlichkeit. Gleichzeitig entwickeln sich fortwährend neue Strategien, in dieser zunehmenden Öffentlichkeit des privaten Lebens Zonen oder Enklaven der Intimität herzustellen. Zur Darstellung kommen sieben visionäre Entwürfe von Studierenden, die von grundlegenden Essays zum Thema Körperlichkeit, Sauberkeit und Intimität in Kunst und Architektur begleitet werden.

Schneller Überblick über prämierte deutsche Gestaltung

This book provides readers with a timely snapshot of ergonomics research and methods applied to the design, development and prototyping – as well as the evaluation, training and manufacturing – of products, systems and services. Combining theoretical contributions, case studies, and reports on technical interventions, it covers a wide range of topics in ergonomic design including: ecological design; educational and game design; cultural and ethical aspects in design; user research and human–computer interaction in design; as well as design for accessibility and extreme environments, and many others. The book particularly focuses on new technologies such as virtual reality, state-of-the-art methodologies in information design, and human–computer interfaces. Based on the AHFE 2018 International Conference on Ergonomics in Design, held on July 21–25, 2018, in Orlando, Florida, USA, the book offers a timely guide for both researchers and design practitioners, including industrial designers, human–computer interaction and user experience researchers, production engineers and applied psychologists.

Value Learning Trajectories: Theory, Method, Context provides a theoretical, methodological and contextual framing of value learning alongside individual life trajectories in a diverse range of international educational settings. It brings together philosophical approaches on value learning with empirical research findings from Australia, Austria, Ethiopia, Estonia, Finland, Germany, Iran, the Netherlands and the United Kingdom. A critical interdisciplinary bridge between value learning and life trajectory research, the volume gathers together contributions from leading and emergent researchers to facilitate evidence-informed insights and future collaborations in the field.
