Ford is unwilling to pay for engine replacement even though they have admitted this is fault during the manufacturing processes if the engine is to stall or seize during driving this could lead to serious injury, accident, and even death. Ford is not recalling this engine at this time. Luckily my engine seized while stopped.

Step 1- You need to buy a stem and the exact stem that your car has right now. Step 2- Then, you need to remove the nuts from the stem. Once there is no nut left, you need to keep the TPM sensor in the left hand while pushing stem down by your right hand. For doing this, you will need no extra tools.
