Today most employee learning happens during unstructured on-the-job experiences, social interactions, and while perusing informal learning sources. The challenge for organizations is tracking and reporting on all of this learning in a consistent, reliable way. A great way to do this is by using the new learning technology specification, the Experience API (xAPI), which allows learning content and systems to speak to each other to record and track all types of learning experiences. In this Infoline, you will learn how and why the xAPI has emerged as the next-generation learning standard how to implement xAPI in your organization the benefits and challenges of xAPI how to select appropriate training systems how to assess your organization's readiness for this software standard. This Infoline also includes use cases to help you solve problems you may be experiencing in managing organizational learning, and to help you find new ways to support various types of learning experiences.

Management professionals regularly seek new, cost-effective ways to influence employee behavior to advance productivity and competency within their organization. While best practices are often taught in the classroom, many students lack an understanding of the real world challenges professionals face. Cases on Human Performance Improvement Technologies presents a collection of teaching cases that demonstrate the real-world application of digital tools for human performance enhancement across a variety of settings. Utilizing a problem-based instructional technique, the cases presented in this publication include the challenges and solutions industry professionals encounter. This publication is an essential reference source for educators, upper level students, and practitioners in the fields of human-computer interaction, organizational development, educational technology, and business management.

the skills and abilities necessary to succeed in a wide range of mechanical-related occupations. It includes supplementary text on machines and provides hundreds of multiple-choice questions that include, but are not limited to: use and knowledge of tools and machinery; basic geometry and mathematics; mechanical comprehension; and more.

It is a requirement of The Occupational Safety and Health Administration (OSHA) that any person who operates a forklift should receive proper training and be evaluated under a minimum set of safety standards. Carolina Trucking Academy is pleased to offer a program designed to comply with these standards to those who wish to pursue work as a forklift operator.
