Project management is about making things happen. Good project management is what makes the real work a success. Bad or missing project management can taint and nullify the efforts of even the most talented people. It doesn't matter how brilliant your work is if the project as a whole is twice as ex-pensive as intended, or a year late.

Incorporating the considerable advances in the field since the previous edition, Handbook of Chronic Kidney Disease Management, 2nd Edition, provides a truly global perspective on managing patients with mild to moderate CKD.

Now fully revised and in its third edition, this comprehensive best-selling text, *Introducing Management: A Development Guide*, explains the principles and practice of management and is ideal for both new and existing managers to assist them in their role. The text incorporates the latest innovations in management thinking and reflects the changes within the management standards. This is an essential resource for those undertaking qualifications at S/NVQ at Level 3. The learning development is clearly structured in each chapter to include:- Objectives, Insights, Case Studies, Examples, Review Your Learning, Back to Work, allowing the user to check their understanding and apply the concepts and principles to their own work situation.

Thoroughly updated for its Second Edition, this practical, portable handbook provides comprehensive, up-to-date information for all clinicians who need to perform preoperative assessments. The book provides a thorough understanding of the pathophysiology of disease states relevant to anaesthesiology and surgery and offers guidelines on history taking, physical examination, recommended diagnostic tests, and preoperative management. A chapter of case studies in preoperative evaluation is included. New chapters in this edition cover evaluation of the pregnant patient for non-obstetric surgery and preoperative assessment for specific procedures and locations, particularly out-of-OR and ambulatory procedures. This edition's more user-friendly format includes bullet lists and tables to facilitate quick reference.

Chuck Williams presents management concepts and theories through a unique framework and a writing style that truly engages readers and draws them into the material. Focusing on how managers "make things happen" in modern organizations, the text shows the role and impact of management on individuals and organizations. Management, 2nd edition makes frequent use of stories, detailed examples and other unique pedagogical features that reinforce key concepts for the reader and put it in a context that they can relate. Williams' fresh approach, selection of topics, and unique features have been praised by users for their clarity and readability.

This text contains the core body of knowledge for case management practice as delineated by the Case Management Society of America (CMSA), the largest professional organization of case managers. The core curriculum provides a "synthesis of case management evolution," and presents essential elements, concepts, and vision for current and future case management practice. This edition is significantly expanded to reflect the dynamic changes taking place in case management. Each chapter is organized in a consistent format that includes learning objectives; introduction; important terms and concepts; key definitions; and references.

Following on from the successful first edition of *Waste Treatment & Disposal*, this second edition has been completely updated, and provides comprehensive coverage of waste process engineering and disposal methodologies. Concentrating on the range of technologies available for household and commercial waste, it also presents readers with relevant legislative background material as boxed features. NEW to this edition: Increased coverage of re-use and recycling Updating of the usage of different waste treatment technologies Increased coverage of new and emerging technologies for waste treatment and disposal A broader global perspective with a focus on comparative international material on waste treatment uptake and waste management policies

Rescue the Problem Project provides project managers, executives, and customers with ways to accurately assess issues and fix problems. Many books explain how to run a project, but only this one shows how to bring it back from the brink of disaster.

Focus: Irish Traditional Music is an introduction to the instrumental and vocal traditions of the Republic of Ireland and Northern Ireland, as well as Irish music in the context of the Irish diaspora. Ireland's size relative to Britain or to the mainland of Europe is small, yet its impact on musical traditions beyond its shores has been significant, from the performance of jigs and reels in pub sessions as far-flung as Japan and Cape Town, to the worldwide phenomenon of Riverdance. Focus: Irish Traditional Music interweaves dance, film, language, history, and other interdisciplinary features of Ireland and its diaspora. The accompanying CD presents both traditional and contemporary sounds of Irish music at home and abroad.

Tourism is often described as an industry with high growth rates, and it is subject to radical change in how it is produced and consumed. However, there is still a relatively poor understanding of how such changes are brought about – that is, through innovation. This book is the first to provide a comprehensive review of innovation in tourism, while also considering how tourism itself contributes to innovative local, regional and national development strategies. This timely book places tourism innovation in the context of current academic and policy concerns relating to knowledge, competition, and the management of change. A substantial introductory chapter provides an overview of what makes innovation in tourism both distinctive from, and similar to innovation in other economic sectors. This is followed by three general scene setting chapters which explore how competition and the search for competitiveness drive tourism innovation, how knowledge transfers and knowledge creation lead the process, and how institutions shape innovation. These provide a coherent theoretical framework for understanding the roles of different agencies in innovation, ranging from the state, to the firm, to the consumer. The next four chapters analyze innovation at different scales. Two chapters review the territorial dimensions of innovation through the fresh perspectives of the national and regional innovation systems, followed by reviews of the determinants of innovation in the firm, and the contested and complex role of entrepreneurship. The final chapter summarises the importance of understanding tourism innovation. This is a groundbreaking volume which provides an accessible introduction to a key but neglected topic. It provides a readable account of the multidisciplinary research on innovation and relates the emerging theoretical framework to tourism. A clear conceptual framework is complemented by fifty boxes which provide a range of illustrative international case studies. This book will be a useful guide for researchers and students of tourism studies, management and business and geography.
