~~Answers To Pig Dissection Worksheets - Learny Kids~~

Pigs, one of the most similar animals to humans, have been used to inform and teach students about the circulatory, respiratory, and digestive system through a procedure called a dissection for many years. Pigs are similar to humans through the fact that they have skin, not fur or feathers, they are omnivores, and when they are a fetus they receive nutrients from an umbilical cord connected to the mother, so it is natural to pick such an animal to compare to the human organ systems.

Fetal Pig Dissection Background: Mammals are vertebrates having hair on their body and mammary glands to nourish their young. The majority are placental mammals in which the developing young, or fetus, grows inside the female's uterus while attached to a membrane called the placenta. The placenta is the source of food and oxygen for the fetus, and it also serves to get rid of fetal wastes.
