Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Becausestudents who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. Theauthors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging,race/racism and health, mental health, and healers and healing.

A seasonally appropriate anthology of poems about the deadly art of murder ranges from old Scottish ballads to hard-boiled 20th-century noir and includes depictions of colorful villains and victims as immortalized by such writers as Browning, Hardy and Auden.

The Death of Her is a haunting psychological thriller from Debbie Howells, author of the bestselling Richard and Judy Book Club success The Bones of You. A woman's body is discovered on a Cornish farm, battered and left for dead in a maize field. Airlifted to hospital, her life hanging in the balance, no one's sure who she is. Three days later she comes round, but her memory is damaged. She knows her name - Evie - but no more, until she remembers another name. Angel - her three-year-old daughter. As the police circulate Evie's photo, someone recognizes her. Charlotte knew her years ago, at school, when another child went missing. Leah Danning, who vanished whilst in Evie's care. When the police search Evie's home, there's no sign of Angel. More disturbingly, there's no evidence that she ever lived there, forcing the police to question whether Evie's having some kind of breakdown. But even from the darkest place she's ever known, Evie believes her daughter is alive. The police remain unconvinced - unaware that on the fringes of Evie's life, there's someone else. Someone hidden, watching her every move, with their own agenda and their own twisted version of reality. PRAISE FOR THE BONES OF YOU 'A dazzling debut . . . Haunting, compelling' Daily Mail

Davie Jones—an ugly duckling growing up in small-town Mississippi with a mother who couldn't get any meaner—is positive her life couldn't be any worse. Just when she's resigned herself to her fate, she sees a movie that will change her life—Sixteen Candles. But in her case, life doesn't imitate art. Tormented in school and hopelessly in unrequited love with a handsome football player, Davie finds it bittersweet to dream of Molly Ringwald endings. When a cruel school prank goes too far, Davie leaves the life she knows and reinvents herself in the glittery world of Hollywood—as a beautiful and successful lounge singer. Just as she's about to ride off into the L.A. sunset, the past comes back with a vengeance, threatening to crush Davie's dreams—and break her heart again. With wholly original characters and a cinematic storyline, 32 Candles introduces Ernessa T. Carter, a new voice in fiction with smarts, attitude, and sassiness to spare.

With U.S. intelligence agencies wracked by internal power struggles and paralyzed by bureaucracy, the president has been forced to establish his own clandestine group--Covert-One. It's activated only as a last resort, when the threat is on a global scale and time is running out. THE UTOPIA EXPERIMENT When Dresner Industries unveils the Merge, a device that is destined to revolutionize the world and make the personal computer and smartphone obsolete, Covert-One operative Colonel Jon Smith is assigned to assess its military potential. He discovers that enhanced vision, real-time battlefield displays, unbreakable security, and near-perfect marksmanship are only the beginning of a technology that will change the face of warfare forever--and one that must be kept out of the hands of America's enemies at all costs. Meanwhile, in the mountains of Afghanistan, CIA operative Randi Russell encounters an entire village of murdered Afghans--all equipped with enhanced Merge technology that even the Agency didn't know existed. As Smith and Russell delve into the circumstances surrounding the Afghans' deaths, they're quickly blocked by someone who seems to have access to the highest levels of the military--a person that even the president knows nothing about. Is the Merge really as secure as its creator claims? And what secrets about its development is the Pentagon so desperate to hide? Smith and Russell are determined to learn the truth. But they may pay for it with their lives . . .
