Z331 Fall 2010 Ecampus Week 5 Muscle Microanatomy II ...

A sarcomere it is the fundamental functional unit of striated muscle, that is, of skeletal and cardiac muscle. Skeletal muscle is the type of muscle that is used in voluntary movement and the heart muscle is the muscle that is part of the heart. To say that the sarcomere is the functional unit means that all the components necessary for contraction are contained in each sarcomere.
