Reading ages assessment | Teaching Resources

It can be difficult to know exactly what level your child is reading at, so this simple test has been created to help you quickly find out which Read with Oxford Stage suits your child best. Once you have found the right Stage for your child, you can explore a range of support and resources specially matched to them.

Which reading Level or Stage is your child? | Oxford Owl

Their reading ages four months previously ranged from 0-10.9 years on the Holborn graded sentences test and from 5.9 to 9.3 years on the Schotieil word test, seven months previously. Materials were two texts of 104 and 110 words, sufficiently difficult to result in a spread of scores because few if any subjects could score perfectly.

Educational Research Volume 29 Number 3 November 1987...

HISTORY: The Schonells worked closely with Orton and Gillingham when they organised phonograms into a sequential, sound-symbol based, linguistically logical, understandable teaching order. Their spelling test is still relevant today, as is the work of Orton-Gillingham.

SCHONELL TESTING ~ Smart Achievers

Schonell Reading Test: Reading Age The child should read the words left to right. When a word gets difficult, ask the child to sound it out. If the child can't say the word, then go on to the next one. The proctor supervising the test will give one mark for each word correctly pronounced - even if the reader self corrects.

Slow reading speed is where a learner takes longer than expected to decode the words the first time they read – either aloud or silently. Slow reading comprehension speed is where a learner needs to re-read text many times in order to absorb its meaning. The latter is clearly a disadvantage in a timed assessment, and the Exact is a very useful tool that assessors can use to confirm the need for extra time where a candidate scores less than 85 on the reading comprehension speed subtest.

The Delton Silent Reading Test, Forms A and B, was developed as an alternate test for the Schonell Silent Reading Test which is currently used for screening the reading comprehension of special students. The aim of the Delton Silent Reading Test is to achieve greater consistency in mid-year and mid-program assessments for special students who were originally assessed with the Schonell Silent Reading Test. This study reports the development of the Delton Silent Reading Test and the validation process undertaken to determine the equivalence of content, readability levels, comprehension strategies, questioning strategies and student test scores on the Delton and Schonell tests. Results indicate that there is no significant difference between matched test items on the Delton and Schonell Silent Reading Tests for item content, readability levels and reading and questioning strategies. Results from correlations of student test scores indicated that test scores did not differ significantly. (r=.93,p

This special issue describes numerous cases of phonological dyslexia, including a developmental case which has been studied in depth, and two cases of the disorder in Japanese readers. The implications of data from acquired phonological dyslexia for computational models of reading are discussed.

This book contains clear chapter objectives, suggestions for further reading on each topic and a glossary explaining key terms that the new or trainee teacher will need to understand. The authors have all taught English in the primary setting, are experienced teacher trainers and respected practitioners in their own specialist fields.

Frontiers in Cognitive Neuroscience is the first book of extensive readings in an exciting new field that is built on the assumption that "the mind is what the brain does," and that seeks to understand how brain function gives rise to mental activities such as perception, memory, and language. The editors, a cognitive scientist and a neuroscientist, have worked together to select contributions that provide the interdisciplinary foundations of this emerging field, putting them into context, both historically and with regard to current issues. Fifty-five articles are grouped in sections that cover attention, vision, auditory and somatosensory systems, memory, and higher cortical functions. They range from Gazzaniga and Bogen's discussion of functional effects of sectioning the cerebral commissure in man and Geschwind's classic study of the organization of language in the brain, published in the 1960s, to contemporary investigations by Schiller and Logothetis on color-opponent and broad-band channels of the primate visual system and by Bekkers and Stevens on presynaptic mechanisms for long-term potentiation in the hippocampus. The editors have provided both a general introduction and introductions to each of the five major sections. Stephen Kosslyn is Professor of Psychology at Harvard University. Richard Andersen is Professor of Neuroscience and Director of the McDonnell-Pew Center for Cognitive Neuroscience at the Massachusetts Institute of Technology.

A useful guide to best practice including reviews of the latest and most helpful tests available. In Part One, contributors discuss the theory of reading assessment including issues such as screening, legal aspects, memory and visual problems, computer based assessment and the dyslexias. Part Two contains the review section where experts give comprehensive reviews of named tests.

Originally published in 1985, Learning to Read presents a balanced view of contemporary research into the reading process and theories accounting for reading and poor reading. The book focuses in particular on children who experience considerable difficulty in acquiring necessary reading skills. It considers how reading ability is assessed and the problematic subject of dyslexia. It also adopts a comprehensive approach to the cognitive factors behind poor reading, as well as possible developmental and environmental factors. Learning to Read will appeal to those with an interest in how children learn to read and the development of research on this subject.

Tests in Education: A Book of Critical Reviews is a collection of reviews of tests used in education. Topics covered by the reviews include early development, language, mathematics, composite attainments, general abilities, and personality and counseling. In the introduction, the tests reviewed, their range, and their accessibility and availability are discussed, along with the issues taken into account by the reviewers in the preparation of their reviews. Some of the desiderata for published tests are considered and the principles and issues frequently referred to by the reviewers are highlighted. The next section is devoted to the test reviews, which cover early development, language, mathematics, composite attainments, general abilities, and personality and counseling. The final chapter focuses on a number of other reviews for tests such as the Comprehension Test for College of Education Students, Garnett College Test, Maitland Graves Design Judgement Test, The Meier Art Tests, Modern Language Aptitude Test, Seashore Measure of Musical Talents, and Wing Standardized Tests of Musical Intelligence. This monograph will be of value to a wide range of professionals, including teachers, higher administrative staff and educational advisers, educational psychologists, medical officers, speech therapists, pediatricians, psychiatrists, and social workers.

Originally published in 1960. The authors of this text examine ways in which both ordinary schools and special needs schools can further develop suitable education for pupils with special needs, including improved post-school guidance. This title aims to provide a guide to teachers in deciding the aims of their teaching and to assist in the planning of their teaching methods.

This set of 62 volumes, originally published between 1951 and 1999, amalgamates a wide breadth of literature on Special Educational Needs, with a particular focus on inclusivity, class management and curriculum theory. This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject how it has evolved over time, and will be of particular interest to students of Education and those undertaking teaching qualifications.
