Advice to stay at home during the pandemic was meant to keep people healthy. But it put some Kansas City residents at risk because of rodents, mold and other unhealthy conditions in their homes.

Even When Kansas Citians Find Housing, Dangerous Building Conditions Make Them Sick

PennEnvironment Research & Policy Center on Thursday released a report on U.S. beaches with water that could potentially make swimmers sick ... also listed causes and solutions.

The twenty-first century is gridlocked. Mass motorisation has ruptured community ties, bankrupted a nation of family shops, and bred a nation of obese children and adults. Politicians stumble from one transport crisis to the next. Lynn Sloman proposes a novel way forward-- not through the big-bang civil engineering projects, but by getting people to think about their choices, rather than reaching for their car keys. She shows how de-motorisation works: in place of traffic, it offers neighbourly streets and vibrant city centres. Copenhagen's decision to create pedestrian streets in the city centre has made it an outdoor theatre, filled with celebration and spectacle even in winter. From small towns like Langenlois in Austria, to the centre of London, de-motorisation is transforming urban surroundings. We do not need to get rid of cars altogether. What we do need is to change the way we think about travel. Car Sick is a passionate, well-argued case for moving away from a car-centred to a people-centred society.

The U.S. healthcare system is in "complete chaos-disarray." Medical costs have increased significantly over the past 6 years with 70% increase for deductibles and 24% or more for health insurance premiums. All the while, workers earnings have either not increased or if they did, the pay raises were for less than the increase in the cost of medical care. The situation is unsustainable and the public wants the system fixed. This book offers ways of fixing the problems in healthcare. HEALTHCARE's OUT SICK - PREDICTING A CURE - Solutions that WORK !!!! first defines the "healthcare in crisis" problem. Through real patient experiences, the book describes the difficulties of getting through the maze of complexity among the plethora of "silo providers" which make up the industry. The heart of the book provides readers with a comprehensive solution that can work, a disruption that is necessary to provide Americans the medical care they need without the US public and healthcare providers and payors going into bankruptcy, insolvency or closure. This book delves into digitized medicine, payor and provider reimbursement models, and value-based healthcare delivery. It also includes a philosophy or mode of thinking and operation for the solutions that are needed for diagnosis-effective, cost-effective, and time-efficient healthcare delivery, of which digitized medicine, value-based care, and payor reimbursement modes are just some of the factors. The authors propose that the real solution involves having the patient at the center of the issues and changing from an archaic gold standard way of thinking to a "Predictive Analytic thinking" where one gets at the real truth by doing "real science" that in the end becomes effective not only for the population but for the individual person. This all leads to real person-centered and person-directed medicine and healthcare delivery.

Russell Jones is a living example of what is possible in physical fitness and wellness. At 66 years old he looks and feels better than people half his age. This book was created to help offer a solution to the many people who live their day to day lives feeling sick and tired and are ready to make some changes and live their best life in the only body they'll ever have. I'm Sick & Tired of: 1. America being obese & overweight (as a kid growing up 15 people could fit in an elevator, now only 3). 2. my friends & family dying way too young. 3. people coming to me injured, sick & out of shape to tell me everything they know about health. 4. lazy, out-of-touch doctors who would rather write a prescription than offer sound guidance on how to eat and exercise. 5. the fitness industry preying on people who need real help. 6. hearing people blame their genetics for their health woes when the truth is that it's their lifestyle. 7. finicky eaters of all ages. 8. how physically weak America has become. 9. erectile dysfunction commercials. 10. people who tell me how many steps they took today. 11. 20 year old fitness gurus. 12. those who tell me how their doctor told them how fit they are but that they have to stay on 3 LifeTime medications. 13. the 2 major obstacles to everyone's health... mis-information & habits. 14. health experts who either look anything but healthy or are on a PED needle (performance enhancing drugs). 15. yoga classes filled with uncontrollable gas. If all the world became vegetarians, it would be people emitting vast quantities of methane gas replacing cows as #1. 16. everyone being braced-ankles, knees, backs, elbows, wrists, necks. Braces can hold you up BUT eventually they hold you back. 17. of desperate people signing up for the 'quick fix'- gastric bypass, gastric sleeves, vitamins, magic potions and 'lose weight quick' scams. 18. people being tired with no energy or vitality & not knowing what to do about it. 19. hearing how people can't get a deep sleep without drugs. Note: sleep is as important as diet and exercise. 20. folks not being able to 'live the life' they desperately want to live. 21. hearing people complain of back & neck pain with their only solution being drugs. 22. folks wasting money on bogus exercise equipment. 23. the food industry and how government approves of health-killing 'foods' to eat (follow the money). 24. the fight-cancer industry(follow the money) 25. parents & grandparents unable to participate in energetic activities with their families. 26. people thinking it's normal to be abnormal and saying 'it's just the way I am'. I try not to offend anyone. But if I do, it's with Love in my Heart.

What This Book Can Do for You? Is it possible not to get sick? Does it sound too good to be true? I used to get sick often; colds, flu, headaches, stomach aches, earaches, allergies, you name it, where I relied on all the "Big Pharma" solutions, where sickness just seemed to be a part of my life, continuing to haunt me several times a year. Especially the yearly dreaded "flu season!" I became tired of getting shots and fed up with the routine of frequently visiting pharmacies or my doctor, spending precious time and money on things that didn't seem to work so well. So I started searching and discovering amazing solutions which at first according to "the mainstream," are often labeled as impossible. So, if you're reading this, hopefully, you keep an open mind. I don't believe anyone enjoys staying home in bed from a general cold or flu, or something else nasty, where one needs medical care, missing work, losing money, or not being able to participate in other important life events. And, although these solutions may not work in every circumstance, as life can be complicated and nothing can be 100 percent guaranteed, I've experienced from my actual real-world results, plus many others who have used these methods, that it is possible for a generally healthy person, to use these preventions/solutions to avoid the cycle of illness. "Life is an adventure to enjoy, explore, learn, and grow." Perfect Solutions

"The Allergy Solution is a game changer." — David Perlmutter, M.D., #1 New York Times best-selling author of Grain Brain An epidemic of allergies is spreading around the world. One billion people suffer from allergic diseases such as asthma, hay fever, eczema, and food allergies. But this is just the tip of the iceberg. In this eye-opening book, award-winning integrated-medicine expert Leo Galland, M.D., reveals the shocking rise of hidden allergies that lead to weight gain, fatigue, brain fog, depression, joint pain, headaches, ADHD, digestive problems, and much more. Astonishing new research shows how each of these is linked to the immune imbalance that is at the root of allergy. A brilliant clinician, Dr. Galland has unlocked the power of this breakthrough science to help thousands of patients who have struggled with mysterious symptoms answer the question: "Doctor, what 's wrong with me?" In The Allergy Solution, he is joined by his son, Jonathan Galland, J.D., a passionate health writer and environmental advocate, in exposing the truth that just as the earth 's environment is out of balance, our bodies are out of balance. The modern world, with pollution, unhealthy eating habits, lack of exercise, and excessive exposure to antibiotics, is fueling the rise in allergies. The Allergy Solution takes an in-depth look at how we can balance immunity through nutrition and lifestyle to reverse allergies without drugs. It offers an easy nutritional program, starting with a Three-Day Power Wash designed to "clear the tracks," to help us take back control. Do you suffer from asthma, eczema, or sinusitis? Are you sick of pain, fatigue, brain fog, weight gain, depression, anxiety, or wondering what is behind your mysterious symptoms? Let Dr. Galland 's clinical experience and unique insights into cutting-edge science guide you back to health.

An award-winning Northwestern University psychology professor reveals how the cultural obsession with women's appearance is an epidemic that harms women's ability to get ahead and to live happy, meaningful lives, in this powerful, eye-opening work in the vein of Naomi Wolf, Peggy Orenstein, and Sheryl Sandberg. Today ' s young women face a bewildering set of contradictions when it comes to beauty. They don ' t want to be Barbie dolls but, like generations of women before them, are told they must look like them. They ' re angry about the media ' s treatment of women but hungrily consume the very outlets that belittle them. They mock modern culture ' s absurd beauty ideal and make videos exposing Photoshopping tricks, but feel pressured to emulate the same images they criticize by posing with a "skinny arm." They understand that what they see isn ' t real but still download apps to airbrush their selfies. Yet these same young women are fierce fighters for the issues they care about. They are ready to fight back against their beauty-sick culture and create a different world for themselves, but they need a way forward. In *Beauty Sick*, Dr. Renee Engeln, whose TEDx talk on beauty sickness has received more than 250,000 views, reveals the shocking consequences of our obsession with girls ' appearance on their emotional and physical health and their wallets and ambitions, including depression, eating disorders, disruptions in cognitive processing, and lost money and time. Combining scientific studies with the voices of real women of all ages, she makes clear that to truly fulfill their potential, we must break free from cultural forces that feed destructive desires, attitudes, and words—from fat-shaming to denigrating commentary about other women. She provides inspiration and workable solutions to help girls and women overcome negative attitudes and embrace their whole selves, to transform their lives, claim the futures they deserve, and, ultimately, change their world.
