The Sun in the Church: Cathedrals as Solar Observatories is a historical, well-documented, scholarly book concerned both with the use of churches in Italy during the 16th and 18th centuries to obtain observations of the sun for calendric and scientific purposes and with the relationship between the Church of Rome and the heliocentric views of many of the scientists of those times.--Arnold M. Heiser "Science Books and Films "

**The Sun in the Church: Cathedrals as Solar Observatories**---

Between 1650 and 1750, four Catholic churches were the best solar observatories in the world. Built to fix an unquestionable date for Easter, they also housed instruments that threw light on the disputed geometry of the solar system, and so, within sight of the altar, subverted Church doctrine about the order of the universe. A tale of politically canny astronomers and cardinals with a taste ...

**The Sun in the Church: Cathedrals as Solar Observatories**---

The complete review's Review : J.L.Heilbron's account of the use of cathedrals as solar observatories explores a fascinating chapter in the history of science. The basic problem addressed is the measurement of time: since the earth's orbit around the sun is not neatly divisible into a whole number (of days) -- and the moon's orbit similarly is not exactly 28 days -- calendars tend to fail ...
